SUMMARY

Detail-oriented Quality Assurance and technical professional with experience supporting agile software development teams through manual and automated testing, defect reporting, and cross-functional collaboration. Skilled in creating and executing test cases, troubleshooting issues, analyzing data, and communicating clearly with both technical and non-technical stakeholders. Experience with Cypress, SQL, Excel, GitLab, Docker, Claude, and growing exposure to Playwright.

TECHNICAL SKILLS

Testing & QA: Manual Testing, Test Case Creation, Defect Reporting, Cypress, Selenium, Playwright (familiarity), Chrome DevTools, CI/CD Workflows

Languages & Development: Python, JavaScript, HTML, CSS, React, SQL, Bash

Databases & Data Tools: PostgreSQL, MS SQL Server, MySQL, AWS RDS, BigQuery, Excel (PivotTables, XLookup, Power Query, Macros), Tableau, Power BI, Salesforce

Version Control & Cloud: Git, GitHub, GitLab, Docker

Collaboration & Project Tools: ClickUp, Jira (familiarity), Odoo, Discord, Slack, Teams, Zoom, Loom, Figma

EXPERIENCE

Quality Assurance Analyst | Zelifcam | April 2024 to Present

- Perform manual and automated testing for different software development projects within agile and CI/CD development environments
- Developed reusable Cypress tests to improve regression testing coverage and efficiency across development cycles
- Identify, document, reproduce, and track software defects through detailed written reports, screen recordings, and developer collaboration
- Create and execute test cases for application functionality, user workflows, regression scenarios, and release validation
- Work closely with developers and project managers to clarify requirements, troubleshoot issues, meet deadlines, and improve software quality
- Utilize GitLab, SQL, Docker, Chrome DevTools, IntelliJ, Rollbar, ClickUp, Claude, Curl, and related QA/testing tools throughout the development lifecycle
- Contribute to proactive quality practices by creating reusable test coverage and improving testing processes
- Leverage AI-assisted development tools including Claude to support test creation, debugging, and workflow efficiency

Database Manager | RosmanSearch (Hybrid) | February 2022 to April 2024

- Supported healthcare recruiting operations through database management, reporting, and technical process improvements
- Built Python scripts, SQL queries, Excel macros, and Salesforce workflows to automate data updates and reporting tasks
- Created internal tools and GUI interfaces to improve data accuracy and team efficiency
- Developed dashboards and reports to communicate operational insights to technical and non-technical stakeholders
- Troubleshoot data inconsistencies and maintained high levels of data quality and organization

Secondary English Teacher | Cleveland Metropolitan School District | 2017 to 2021

- Taught grades 9, 10, 11 in English Language Arts as well as AP Language, Speech, Creative Writing
- Fast-paced environment helping students, creating learning content, and giving timely feedback to facilitate their growth and learning

EDUCATION

- Backend, SQL, and DevOps with Python Bootcamp with Honors from nucamp (August 2022)
- Master in Education from Cleveland State University, B.S. in Mathematics, B.A. English from Ohio University
